New Oricans, La., September 22.—Cotton—Spot cotton quiet and steady; unchanged; middling, 137-16c. Sales on the spot 15 bales and 21s to arrive Futures opened steady, unchanged to 1 point up. The weather map was favorable, indicating clear and dry weather everywhere in the cotton of country, but this as a bearish feature was offset by the growing tendency of farmers to market their cotton with more caution, private messages from many sections of Mississippi and Texas asying that farmers were hauling cotton back hose and storing it instead of jetting it go at prices offered by buyers. This caused some little buying for both accounts, and at the end of the first half hour of trading prices were 7 points up. In the aftermion session the market was quiet, but stead. The advance on the more active months was widened to 12 points. At 2 o'clock prices were within 1@7 points of the highest. Octon futures closed steady.
